OK to all, and thanks. Have a great weekend.

Jackie,

Good news! We are cleared to join the EPA for tours of the tire crumb facilities, both in [REDACTED] on May 12 and the [REDACTED] facilities (date TBA).

So, put me and Aaron down for the [REDACTED] tours.

FYI...I'll be away on annual leave on May 16-30. If the [REDACTED] tours happen during my absence, check with Mike Babich. We might want to send someone else from CPSC. But if I'm here, I definitely want to see the [REDACTED] facilities.

Thanks!
-Eric

Excellent. Thanks, Jackie. The other person from CPSC is Dr. Aaron Orland. He's the Division Director for our chemistry labs. He sat next to me the day you were here for the STC visit.

That's ok, I'm waiting to confirm with CPSC before checking with others here. I will put CPSC down for 2. Who is the second person?

Jackie,

Sorry. If it's not too late, we have a chemist who would like to join the May 12 tour. So, put CPSC down for 2! We're still waiting for approval from "upstairs", but for now let's assume it'll be allowed. Sorry for the uncertainty.

Thanks, Jackie! My chemist says she is out of town the week of May 12, so it would just be me. Hopefully she could join the [REDACTED] field trip.
Still waiting on our lawyers to approve me going on the May 12 trip.

OK, I'm sending another e:mail string your way on a [REDACTED] opportunity. You can think about that one as well, but no date is set. This is just a heads up.

We're checking right now.

If you want two slots, let me know asap. The limit for the group size is determined by the facility (safety issues and also the logistics of moving around the group within the buildings).

But if you want 2 slots, I will try to limit the number on my end. Just let me know as soon as you can.

Either way, you can drive separately. I probably will.

Jackie

Jackie:

Quick question. If I drive separately, can I bring one of our chemists with me? I understand if there is a need to keep the group small.

Subject: Upcoming tour of tire crumb processing

Hi Eric

We have scheduled a May 12 tour of the [Ex. 3 [CERCLA 104(e)(7)(42 USC 9604(e)(7))]/Ex. 5 DP] and their associated [Ex. 3 [CERCLA 104(e)(7)(42 USC 9604(e)(7))]/Ex. 5 DP] near [Ex. 3 [CERCLA 104(e)(7)(42 USC 9604(e)(7))]/Ex. 5 DP]. They are about 20 minutes away from each other. The main plant processes the whole tire into 4" pieces, then sends them to the [Ex. 3 [CERCLA 104(e)(7)(42 USC 9604(e)(7))]/Ex. 5 DP] where the tailings are made into the tire crumb.

These plants process the rubber into playground materials as well as into turf infill. We would like to offer you a slot to attend. The tour on May 12 is from 1 - 3:30. There is some talk here of renting a van, but that probably isn't convenient for you.

Can you let me know soon if you want to participate? I will hold a slot for you until I hear back one way or the other. We will send a full list of participants to the facility soon.

If you want to discuss, please call today at [Ex. 6 Personal Privacy (PP)] or next week at [Ex. 6 Personal Privacy (PP)]

Thanks, have a good weekend.

Jackie McQueen
